VRCUT™

CUT WITH CONFIDENCE

VRCut is a software solution designed to automate the digital printing and finishing workflow by optimizing Pre-Press, Print, and Finishing processes.
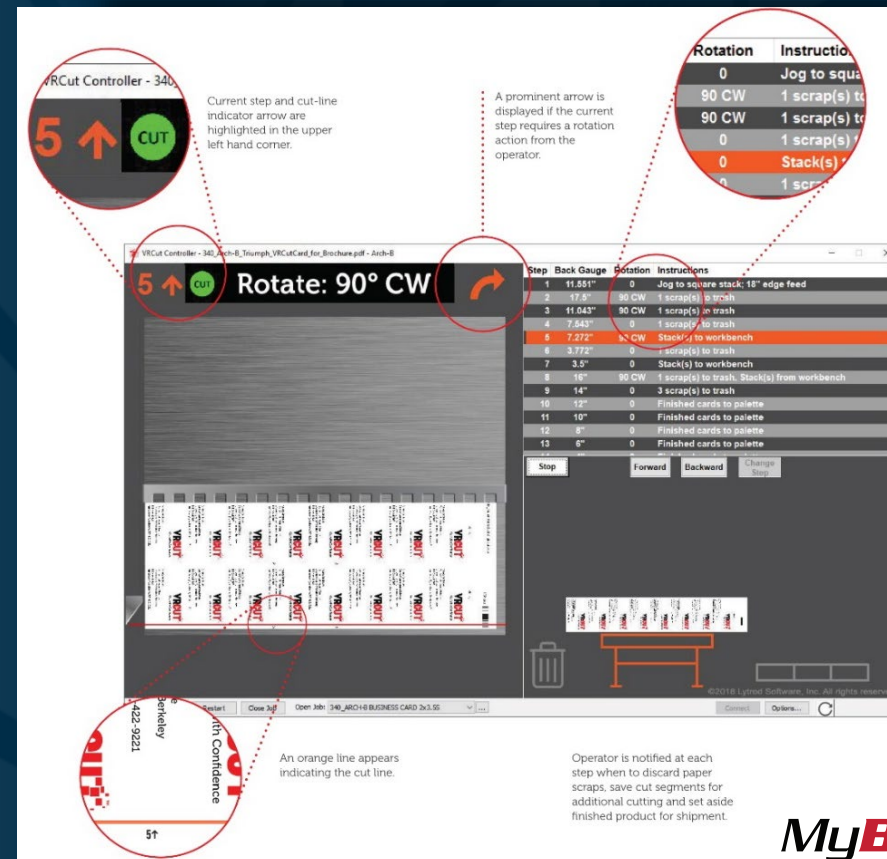

Two Modules, One Solution

VRCUT™ *Ready* TRIUMPH®

▶ VRCUT IMPOSE
PC- Imposition Software

A barcode is automatically created that can be scanned for error-free job recall on the Triumph cutter.

As an additional guidance measure, cut sequence numbers and arrows are printed on the sheet to guide the operator.

▶ VRCUT CONTROLLER
Tablet- Automated Cutting Guidance System

Current step and cut-line indicator arrow are highlighted in the upper left hand corner.

A prominent arrow is displayed if the current step requires a rotation action from the operator.

An orange line appears indicating the cut line.

Operator is notified at each step when to discard paper scraps, save cut segments for additional cutting and set aside finished product for shipment.

Minimize Clicks…Drive Efficiency

VRCut Impose

Now with Smart Layout Assistant™ Technology

- Create PDF documents optimized for Triumph cutters

- Cut mark indicators are automatically placed in document margins for additional accuracy check

- Barcodes are placed on top of page for automated job selection by the VRCut Ready Triumph cutter

- Supports cut through stack sorting of multi-page PDFs and mail merge data files (CSV)

- Intuitive interface to create complex layouts quickly

- Seamless integration to VRCut Ready Triumph Cutter

Business card artwork is imposed into a PDF print file.

A barcode is automatically created that can be scanned for error-free job recall on the Triumph cutter.

As an additional guidance measure, cut sequence numbers and arrows are printed on the sheet to guide the operator.

Franchise Friendly. Beneficial to Novice & Expert Operators.

VRCut Controller

- ▶ Software installed on tablet device directly connected to cutter

- ▶ Scan barcode for seamless job selection

- ▶ Use job-specific artwork for exact visual representation

- ▶ Operators are given multiple visual, audio and graphic representations of cutting sequence

- ▶ As operators go through the cutting sequence, the cutter back gauge is automatically positioned for the next cut

VRCut Ready TRIUMPH

VRCut Controller Hardware Kit

MBM

LYTROD SOFTWARE
